Education

Minerva University *(named #1 the most innovative university in the World by WURI)* **San Francisco, USA**

Bachelor of Science, Computational and Social Sciences *2024 - 2028*

Relevant courses: Problem Solving with Data Structures & Algorithms, Psychology, AI Algorithms, Software Development, Theory & Research in the Psychological Sciences, Economics, Data Analysis, Complex Systems, Multimodal Communications

Experience

Technical Project Manager **Tokyo, Japan**

NTT East Japan *Jan 2026 - Apr 2026*

- Lead development of an internal workplace wellness app, managing a diverse team of 7 from research to launch
- Analyzed interviews with ~15 employees to surface human-centered product requirements and address user needs.
- Developed a full-stack prototype from UX wireframes to backend implementation (React, Flask, database)

Teaching Assistant in Computer Science **San Francisco, USA**

Minerva University *Aug 2024 - Present*

- Prepare and lead weekly programming sessions and office hours for groups of 15-20 undergraduate students.
- Prepare weekly reports on session effectiveness and improvement ideas for university team meetings.

Technical Project Manager **San Francisco, USA**

NASA Space Apps *Oct 2024 - Apr 2025*

- Led a team of 8 to develop a data-driven approach for sustainable urbanization using NASA open-sources.
- Developed a platform to simulate environmental metrics (UHI, etc) for urban planning using satellite data, Landset 8.

Data Scientist Intern **Washington, D.C., USA**

Development Monitors LLC *Aug 2023– Dec 2023*

- Trained elevation and resolution AI models using satellite image datasets, Python, PyTorch, and improved model outcome by 2.5x, producing super-resolution landscape images (5-10 meters per pixel).
- Created QGIS 2D and 3D maps of the investigated areas for future integration with landscape and risk layers.
- Completed NASA ARSET(course, webinars, testing)to apply the knowledge gained about satellites to the project.

Junior Data Engineer **Barcelona, Spain**

Hound Line *June 2022 - Aug 2024*

- Developed Robotic Process Automation (RPA) systems for private businesses and governmental organizations using mostly Python and UiPath, achieving a process outcome success rate of ~85-90% by testing and troubleshooting.
- Designed and maintained the architecture for databases, pipelines, and data warehouses using SQL, SSMS, and Qlik for reports and dashboards, ensuring efficient data collection, storage, and optimizing performance (by 10-15%)

Leadership

Founder **Kyiv, Ukraine**

Online School BrainOn *Dec 2021 – Feb 2022*

- Founded an online math school, resulting in students' grades increasing by 1-3 points yearly, and they achieved excellence on national exams, resulting in 85% chosen university admission success

Skills

Soft-skills: critical thinking, creativity, adaptability, initiative, active listening, time management, attention to detail.

Skills: Python, PyTorch, SQL, Qlik, SSMS, React, Flask, HTML, CSS, JavaScript, QGIS, C/C++

Languages: English (fluent), Spanish(conversational), Ukrainian(native)
